Event Report: Use of AI

Date: 2025-04-08

Time: 18:40:00

Location: auditorium

Organizer: KJ Somaiya

Type: Seminar

Number of Attendees: 100

Speakers: Kushal Soni, Sagar, Pragati, Aditya

Agenda of the Event: Personalized Agendas and Itineraries, Automated Customer Support and Ticketing, Enhanced Engagement, Data-Driven Decision Making

Outcomes of the Event: Increased Attendee Engagement, Improved Event Planning and Execution, Enhanced Data Analysis and Insights

The Use of AI seminar was held on April 8th, 2025, at 18:40:00 in the auditorium. The event was organized by KJ Somaiya and attracted 100 attendees. The seminar featured four speakers: Kushal Soni, Sagar, Pragati, and Aditya. The agenda of the event included Personalized Agendas and Itineraries, Automated Customer Support and Ticketing, Enhanced Engagement, and Data-Driven Decision Making.

The Personalized Agendas and Itineraries session focused on how AI can analyze attendee profiles and preferences to suggest relevant sessions, networking opportunities, and activities, creating a customized experience. The session was well received by the attendees, with many expressing satisfaction with the personalized recommendations provided by the AI system. The speakers, Kushal Soni and Sagar, provided valuable insights into the potential of AI in event planning and execution, and how it can enhance attendee engagement.

The Automated Customer Support and Ticketing session showcased how AI-powered chatbots can handle common inquiries, automate ticketing processes, and provide real-time support to attendees. The session was well received by the attendees, with many expressing satisfaction with the quick and efficient support provided by the chatbots. The speakers, Pragati and Aditya, provided valuable insights into the potential of AI in customer service and how it can improve the attendee experience.

The Enhanced Engagement session focused on how AI can facilitate interactive platforms, suggest networking connections, and personalize content, leading to increased attendee engagement. The session was well received by the attendees, with many expressing satisfaction with the interactive features provided by the AI system. The speakers, Kushal Soni and Sagar, provided valuable insights into the potential of AI in event planning and execution, and how it can enhance attendee engagement.

The Data-Driven Decision Making session showcased how AI can analyze event data to identify trends, predict attendance, and optimize resource allocation, leading to more effective event planning and execution. The session was well received by the attendees, with many expressing satisfaction with the valuable insights provided by the AI system. The speakers, Pragati and Aditya, provided valuable insights into the potential of AI in data analysis and how it can improve event planning and execution.

Overall, the Use of AI seminar was a success, with attendees expressing satisfaction with the personalized recommendations, efficient support, interactive features, and valuable insights provided by the AI system. The seminar also provided valuable insights into the potential of AI in event planning and execution, and how it can enhance attendee engagement and improve event planning and execution. The speakers provided valuable insights into the potential of AI in event planning and execution, and how it can improve the attendee experience. The seminar has set the stage for further exploration and adoption of AI in event planning and execution.
